

NIKHIL YADAV

Flutter & Android Developer | Mobile Application Developer

nikhildevr.01@gmail.com | +91 9455366424 | GitHub: github.com/Nikhil-Yadav-01 | LinkedIn: linkedin.com/in/nikhil-yadav-r01 | Portfolio: nikhil-yadav-01.github.io/me

SUMMARY

Flutter and Android developer with hands-on experience shipping production mobile applications across **government, education, and e-commerce** clients, plus a self-directed full-stack microservices project spanning **4 Flutter apps** and **20+ backend services**. Comfortable across the mobile stack (**Kotlin, Dart, Jetpack Compose, Flutter**) and adjacent backend systems (**Spring Boot, Kafka, PostgreSQL**). Solved **300+ DSA problems**; placed **Top 25 of 400+ teams** at a national hackathon.

SKILLS

Languages: Kotlin, Dart, Java, C++
Mobile: Android SDK, Jetpack Compose, Flutter, XML, Navigation, Material Design, LiveData, ViewModel, Coroutines, Flow, Hilt DI
Architecture: MVVM, MVC, Clean Architecture, LLD, Provider, Riverpod
Databases & APIs: Room, SQLite, DataStore, Firebase (Auth, Firestore, Realtime DB), Retrofit, OkHttp, Dio, REST APIs
Backend & Cloud: Spring Boot, Spring Security, Spring Cloud Gateway, Eureka, PostgreSQL, MongoDB, Redis, Kafka, Docker, CI/CD (GitHub Actions), AWS (EC2, S3, RDS)
Tools: Android Studio, VS Code, IntelliJ IDEA, Git, GitHub, Postman, JUnit, Linux, Windows

EXPERIENCE

Flutter Developer — Computer Kendra *Mar 2026 – Present | Agra, India*

- Built and shipped cross-platform **Flutter** applications (Dart, Firebase, REST APIs, SQLite/Hive) for government and educational clients, including an **Employee Management System with face-recognition attendance** and a **Project Management System for Jhansi Nagar Nigam**.
- Integrated **camera, Google Maps, and ML Kit** into production apps, and contributed to backend ASP.NET Core + SQL Server APIs, cutting API response time from **5s to 2s (60% improvement)**.
- Established reusable widget patterns and Git workflows adopted across the team, and worked directly with clients to scope and deliver production-ready releases.

Software Developer Intern — Costoso Italiano *Jun 2025 – Sep 2025 | Agra, India*

- Built Android features (Java, XML, Firebase, Volley) and integrated REST APIs, improving async data loading and UI responsiveness.
- Used Firebase Auth and Firestore for authentication and real-time data sync.
- Triaged and resolved **20+ production issues**, improving app stability and device compatibility.

Android Developer Intern — Titan Flaws *Jan 2025 – Mar 2025 | Agra, India*

- Prototyped a modular Android ERP app (Jetpack Compose, Firebase Auth/Realtime Database) covering **4 core functional modules**.
- Delivered Academics, Attendance, Exams, and Inventory modules within a **6-week MVP timeline**, meeting all functional and stability requirements.

PROJECTS

Grovea Ecosystem | *Full-stack grocery commerce platform (personal project)*

- Designed and built a **4-app Flutter ecosystem** (Customer, Seller, Delivery Partner, Warehouse) using Flutter, Dart, and MVVM, backed by a Spring Boot microservices architecture of **20+ independently deployable services**.
- Implemented core commerce capabilities: authentication, product catalog, inventory, cart, orders, payments, notifications, pricing, and shipping.
- Applied **polyglot persistence** — PostgreSQL for transactional data, MongoDB for the product catalog — with **Redis for caching, Kafka for asynchronous events**, and OpenFeign for inter-service calls.
- Used Spring Cloud Gateway, Eureka, and Spring Cloud Config for centralized routing, service discovery, and externalized configuration across services.

EDUCATION

Bachelor of Technology, Computer Science Engineering
Anand Engineering College, Agra | 2022 – 2026 | SGPA: 8.49

CERTIFICATES & ACHIEVEMENTS

- Java & Spring Boot Training — Softpro India
- Solved 300+ Data Structures & Algorithms problems (C/C++, Java)
- Top 25 of 400+ teams — National QUBITX Hackathon (Invest Wise India)
